Professional Summary

Data Analyst with 6 months of professional experience in operations as associate and hands-on expertise in Python, SQL, Power BI, Excel, Tableau, and Exploratory Data Analysis (EDA). Experienced in building interactive dashboards, analyzing large datasets, automating reports, and delivering data-driven insights to improve business performance. Strong foundation in business intelligence, data visualization, and process optimization with a passion for solving real-world business problems.

Education

Professional Course in Data Analytics — 360DigiTMG **Feb 2025 – Feb 2026**
Python, SQL, Power BI, Tableau, Excel, Machine Learning, Statistics *Bengaluru*

Bachelor of Technology (B.Tech) in Computer Science and Engineering **Nov 2021 – Apr 2025**
Sir C. V. Raman Institute of Technology *CGPA: 8.40/10*

- Relevant Coursework: Database Management Systems, Data Structures, Programming, Statistics, Operating Systems, Software Engineering

Professional Experience

Operational Associate **Jan 2026 – Jul 2026**
MediBuddy *Bengaluru, Karnataka*

- Managed **end-to-end healthcare operations** by coordinating with hospitals, healthcare providers, insurance partners, and internal teams to ensure seamless appointment scheduling, service delivery, and adherence to **Service Level Agreements (SLAs)**.
- Analyzed, verified, and maintained patient, provider and appointment records using **CRM applications**, ensuring high **data accuracy** and compliance with organizational quality standards.
- Prepared **MIS Reports, KPI Reports**, and operational performance reports using Microsoft Excel and Google Sheets to support **data-driven decisions**.
- Performed **data validation**, root cause analysis, and record reconciliation to improve data quality, reduce **Turnaround Time (TAT)**, and maintain operational excellence.
- Collaborated with **cross-functional teams**, including Provider Operations, Customer Support, Hospital Network, and Appointment Operations, to optimize business processes and enhance customer experience.
- Maintained **99% operational accuracy** while processing high-volume healthcare transactions, consistently achieving **SLA compliance** and productivity targets.

Technical Skills

- **Python & Libraries:** Functions, File Handling, Exception Handling, Object-Oriented Programming (OOP), NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn.
- **SQL & Database:** MySQL, Commands, Joins, Subqueries, (CTEs), Window Functions, Views, Stored Procedures, Indexes.
- **Business Intelligence:** Power BI, Tableau, Google Looker Studio, DAX, Power Query, Dashboard Development, Data Visualization.
- **Data Analysis:** Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Data Wrangling, Data Validation, Data Transformation, Trend Analysis, KPI Analysis.
- **Spreadsheet Tools:** Advanced Microsoft Excel, Pivot Tables, Power Query, LOOKUP Functions, INDEX-MATCH, Conditional Formatting.
- **Cloud & Big Data:** AWS (Basics), PySpark.
- **Version Control:** Git, GitHub.
- **Analytics & Methodologies:** CRISP-ML(Q), ETL, Statistical Analysis, Feature Engineering, CRISP-DM

Projects

Hospital Resource Optimization | *Python, SQL, Power BI, Excel*

- Performed **Exploratory Data Analysis (EDA)** on hospital datasets to analyze patient flow, staff utilization, resource allocation, and operational performance.
- Conducted **data cleaning**, preprocessing, integration, and validation of **Electronic Health Records (EHR)**, staff, and inventory datasets using **Python** and **SQL**.
- Designed an interactive **Power BI Dashboard** to monitor **KPIs**, hospital occupancy, resource utilization, and operational efficiency through dynamic visualizations.
- Applied the **CRISP-ML(Q)** framework to identify optimization opportunities and deliver **data-driven insights** for improved healthcare resource management.

Traffic Volume Analysis | *Python, SQL, Power BI, Tableau, Excel*

- Analyzed large-scale traffic datasets using **Python** to identify congestion trends, peak-hour patterns, and traffic flow behavior.
- Performed **data cleaning**, preprocessing, **statistical analysis**, and feature engineering to improve dataset quality and analytical accuracy.
- Developed interactive **Power BI** and **Tableau Dashboards** to visualize traffic density, congestion hotspots, and transportation **KPIs**.
- Generated **actionable insights** supporting traffic optimization, signal planning, and evidence-based transportation decision-making.

Card Manufacturing Analysis | *Python, SQL, Power BI, Excel*

- Integrated production, downtime, defect, and machine utilization datasets to create a centralized analytical repository for manufacturing analysis.
- Performed **EDA**, trend analysis, and **Root Cause Analysis** to identify production bottlenecks, quality issues, and operational inefficiencies.
- Built interactive **Power BI Dashboards** to monitor production **KPIs**, defect rates, machine utilization, and manufacturing performance.
- Delivered **data-driven recommendations** to support process optimization, productivity improvement, and operational excellence.

Certifications

- | | |
|----------------------------|-------------------------------|
| • Python Programming | • Microsoft Power BI |
| • Advanced SQL | • Tableau |
| • Advanced Microsoft Excel | • Professional Data Analytics |
